What's new in this version: In this new version, the program is also compatible with portable devices (USB drives).

1-abc.net File Wiper is a handy tool that makes it easy to safely remove sensitive data from the computer system. The program allows you to

easily and safely wipe data from your system, such as documents, photos and passwords. Its intuitive and easy-to-use interface helps you to securely remove information in just one mouse click. Intuitive file wiper The application is designed to make things easier, which is why it allows you to wipe files from any device connected to the computer: removable devices, USB devices and even portable storage devices. This means that you do not have to spend time searching for the files you need to securely delete.

Convenient feature 1-abc.net File Wiper does not only provide you with a convenient interface and feature set, but it also comes with a history of every erased file, which means that you can review the data anytime, with the help of its intuitive interface. Secure data removal The application can be easily used to securely remove any files that you might have on your system, such as documents, photos and passwords. You can use advanced algorithms and overwrite files with random data, so that they

cannot be restored. Conclusion All in all, 1-abc.net File Wiper is a neat and easy-to-use tool, which allows you to securely remove files from the computer system in a few easy mouse clicks. The application comes with a nice feature set and easy-to-use interface, which makes it suitable for users of all skill levels. 1-abc.net File Wiper Description: 1-abc.net File Wiper is a handy tool that makes it easy to securely remove sensitive data from the computer system. It allows you to easily and securely wipe data

from your system, such as documents, photos and passwords. What's new in this version: In this new version, the application is also compatible with portable devices (USB drives). Total Commander for Linux is one of the most popular file managers on Linux. It features fast, efficient, but also customizable and easy-to-use navigation. This is all possible thanks to Total Commander SourceForge package available for Linux

1-abc.net File Washer Crack+ Free Registration Code Free Download

KeyMacro (free) is an excellent backup, data management and registry software. It includes the capabilities to: Back up your complete PC to CD/DVD, create data backups from CD/DVD and to install CD/DVD with a single click. With KeyMacro you can secure your PC with a password so no one can access your data. It also includes a malware scanner that detects and removes malware from your PC so you will be protected at all times. KeyMacro is compatible with Windows XP, Vista, 7, 8 and

10. With a single, easy-to-use software, you can protect your privacy and avoid identity theft. KeyMacro has four very easy to use modes: Backup Restore Backup to CD/DVD Backup from CD/DVD First of all, KeyMacro stores your backup data on CD/DVD. It can save as many backups as you want and can be used on other computers and installed on any hard drive (USB, CD/DVD, FireWire). All backups can be restored to any hard drive and this option is very convenient as you will not need to

install any software to restore your backups. Secondly, KeyMacro can restore your backup data from a backup CD/DVD. As we have said before, all backup files are stored on a CD/DVD so you can simply restore it using a simple CD/DVD. This is a very convenient option for restoring backups. Thirdly, it is possible to back up your data using a CD/DVD, in case you forget to save it or do not have a CD/DVD on hand. You can install CD/DVD or USB with a single click and KeyMacro will copy the data to the

backup CD/DVD or USB. Finally, you can delete your data with a single click. By deleting files and applications, it will also remove their shortcuts and Registry entries. The Registry cleaner deletes all the programs and settings that make your computer work. KeyMacro includes a PC Cleaner. It can remove the junk from the Registry, which helps your PC work faster. This application detects and removes malware such as Trojans, worms and viruses. KeyMacro also scans your computer for any hidden

files and spyware. KeyMacro includes an option to create a System Restore Point, which is a snapshot of your entire hard drive. This is used to protect your PC in case something goes wrong and you need to restore to a previous

1-abc.net File Washer is a helpful tool that lets you securely delete sensitive data in a few mouse clicks. You can use its powerful methods to wipe files and keep them securely unrecoverable. In addition, it comes with an intuitive interface that makes it easy to access. All of this is provided at a reasonable price. In order to keep your data safe, you can use several algorithms to overwrite files with random data or \$00, \$FF, \$00+\$FF or other known

sequences. Each of them have their own level of security and are available in the program's interface. In addition, you can also wipe browsing history and cookies in one click. With the help of 1-abc.net File Washer, you can also delete selected files or a complete directory. The application can be used to securely erase sensitive data in different ways, and this is one of its key advantages. You can overwrite files with fast methods like \$00, \$FF, \$00+\$FF or random data, but they are not as secure as

slower algorithms. For example, you can use British HMG IS5, DoD II, DoD 3+7+3 or Gutman Method. A clear interface and a history of every wiped file allow you to review your deleted files whenever you want. Furthermore, the program securely erases cookies and your browsing history, so that they cannot be restored by web browsers. 1-abc.net File Washer can be downloaded at no cost. Main Features - Secure data wiping: The software can be used to securely erase files in one click. You can

wipe browsing history, cookies, files and folders. - Erase items with the help of several reliable methods: The application uses several methods to wipe files in a secure way. For example, it lets you use overwriting data with \$00, \$FF, \$00+\$FF or random data. - Multi-level security: The software can be used to securely erase different types of data, as well as to erase specific items. For example, you can choose to delete single files, folders or your entire directory. - Free: The software is completely

free to use and can be downloaded at no cost. - Intuitive and user-friendly interface: The software's interface is intuitive and easy to access. You can use it in one click to securely wipe specific files, browsing history or cookies. - Easy file management: You can create an easy-to-access
