If you don't have an account, you can create an account for free. A few of Nik's best 05a79cecff

Election Roundup – The Bulwark Sees a Major Loss in KY, and JCPenney Scores a Big Win First Round: Reagan Poulson won his race for Clerk in his home district. His opponent Ken Richey was a favorite to win the GOP nomination for Clerk last week, but he lost to Reagan by a big margin. Reagan's campaign strategy was to ignore the rumors about his father and focus on the issues. While most of those who work in the Clerk's office recognize his father's achievements, many rankle at the lack of professionalism and the lack of respect his father gets as a result of being an elected official. Runner-Up: JCPenney It was a big night for JCPenney, winning their first primary since their inception as a national brand. JCPenney has gone through a lot over the last decade since going public, including several big selling points that did not turn into sales. After several unsuccessful test market sales in the 1990's, the company that became JCPenney was founded in 1971. They have since sold to a number of companies and their name has become synonymous with selling apparel, cosmetics, furniture, housewares, and more. You can read their entire announcement here. U.S. Senate: John Cornyn beat the incumbent, but only by a point. The RGA spent the most money on the race, but President Trump has endorsed Rick Saccone who outspent Cornyn with \$4.5 million to Cornyn's \$2.2 million. Alberto Gonzalez gave Democrats some good news, defeating Debra Medina in the Bronx 20th CD. Jake Zyus was unopposed in the special election to replace Sean Patrick Maloney in NY-11. In South Carolina, Congressman Ralph Norman managed to defeat out-of-state super PAC money and is now projected to win the first round of the race against Lucy Boccock. Runoff: Despite infighting and a health scare that earned him public scorn, Dan Bishop will go through to the run-off. Bishop defeated challenger Mark Harris in the 9th district. In Georgia, the battle between Stacey Abrams and Brian Kemp will be decided in the run-off. Final: Erik Paulsen, who was considered a strong pick by the GOP establishment to

Q: Marketing Cloud API PUT /connect/auth call with Version Data We are trying to update fields in a record to make the API call to the Marketing Cloud connector. The data we are sending in the request does not work. For example, if you have a value of {12345678-1234-5678-1234-567812345678} this will not work. The API request says you can't put more than 8 characters. The funny thing is that you can take the same file (postman) and you can update a different field in the record to {12345678-1234-5678-1234-56781234}. The API request passes. It appears as if MC is expecting Version Data and is not getting it. We are creating the request with apex. A: One solution is that you can append the parent record ID of the object that you are updating by including it at the end of the URL. In your case, the object name you are updating would be "PartnerProfile" and the parent record ID would be "12345678-1234-5678-1234-567812345678". In this case, it will look like this: This would be the only way to make it work. However, this is not the most optimal solution as you are basically trying to add an ID (parent object ID) to the url which is more resource intensive. Also, this is not a very "Google like" solution and would not work out of the box with other API's. If you are looking for an optimal solution, please let us know. Observer variation in case finding for postinfluenza pneumonia in emergency department patients. Several studies using general practice and school-based surveillance systems have demonstrated the importance of influenza as a cause of acute lower respiratory infection and pneumonia, but these have not included emergency department (ED) settings. To assess observer variation in case finding for postinfluenza pneumonia in ED patients, four emergency physicians prospectively searched 1122 consecutive adult ED patients for pneumonia over a 4-month period (January through March, 2001).
